Elsie Initiative for Field Missions' Facilities and Infrastructure: Goals

Project objectives

1. Develop women-friendly accommodation standards in field missions and technical support for a successful implementation.
2. Activities related to awareness raising and behavior changes in support of the GPS.

Project deliverables

1. Technical guidance to be incorporated in new system contracts and propose policy changes.
2. Increased awareness and positive behavior changes in field missions.

“Too few missions make an effort to be gender sensitive in the design of missions and mission life”

Elsie Initiative for Field Missions' Facilities and Infrastructure: Focus

The results also show that the concerns from one site to another are largely the same, although the living conditions and environment are radically different.
